

CABLE DUCTS

Name: FU 15	Compression strength: 450 N
Colour: orange	Impact resistance: 5 Kg at -5°C
Material: high-density polyethylene	Application field: electrical installations and/or data transmission
Length supplied: 50-25 m rolls depending on diameter	Installation type: underground
Standard: EN 50086-1 (CEI 23-39) e EN 50086-2-4+V1 (CEI 23-46)	

The minimum curve radius obtainable with the cable ducts of the FU 15 Range is equal to 8 times the external diameter of the cable duct.

THERMOPLASTIC WELLS

Name: PZ	Application field: especially suitable for horizontal systems and earth connections in electrical and buried telecommunications systems
Colour: grey	Installation type: underground
Material: thermoplastic	

LOAD RESISTANCE

VERSION	SIZE	BREAKING LOAD* (kg/cm ²)
Square	200 x 200 x 200	7.4
Square	300 x 300 x 300	4.8
Square	400 x 400 x 400	2
Square	550 x 550 x 480	2.7
Rectangular	360 x 260 x 320	7.7

*The load breaking values refer to closed heavy-duty covers.

It is advisable to firmly anchor the wells to the ground. Prepare a concrete bed of at least 10 cm and cover the rest in earth and cement taking care to avoid height differences between the well cover and the ground surface.

DIMENSIONAL TABLES

FU15 - CABEL DUCTS

FU15 CODE	CABLE DUCTS Ø (mm)	D	d. min.
